Subject: Test America incorrect numbering.

Here is the problem....this validated file uses the 15770 number in the file name and the samples in the summary forms were re-numbered with 15770. If you page thru the file to the raw data, you will see the numbering is back to 15570.

J:\ESAT Downloaded data\Dimock\T4-Validated\R33917 480-15770-1.pdf

But, all other files are labeled as 15570, including the validated EDD. Fortunately, all files contain the same sample set.

Robin,

I checked and the correct file name is 480-15570. There is no 480-15770. Attached is the project page from Test America.

Fred, just checking to see when you might have the next set of EDDs ready?
Pace 5058051
Pace 5058185

TestAm 480-15712-1
TestAm 480-15814-1

Also, I just realized the SEDD file that was sent for TestAm 480-15770 was incorrectly called 480-15570. I looked the file and the correct samples are shown, but, the 15570 is still incorrect.
